Flat shapes are shapes that have length and width but no height. Use the materials provided to construct as many shapes as you can.

Look through the book Shapes, Shapes, Shapes by Tana Hoban. Take a walk around the training facility and find as many triangles as you can.

Look through the book Cubes, Cones, Cylinders, and Spheres. How many of the shapes you see in the book can you make out of playdough?

How many different shapes and designs can you make by using the pieces in a set of tangrams?
